VICTORINOX 1884-2017 MORE THAN 130 YEARS OF EXPERIENCE AND LIVED SWISS TRADITION

The little red pocket knife, with Cross & Shield emblem on the handle is an instantly recognizable symbol of our company. In a unique way, it conveys excellence in Swiss craftsmanship, and also the impressive expertise of more than 2,000 employees worldwide.

The principles by which we do business, are as relevant today as they were in 1897 when our company founder, Karl Elsener, developed the «Original Swiss Army Knife»: functionality, innovation, iconic design and uncompromising quality. Our commitment to these principles for more than 130 years has allowed us to develop products that are not only extraordinary in design and quality, but also in their ability to serve as reliable companions on life's adventures, both great and small.

Today, the full range of Victorinox knives is comprised of over 1,200 models. The range is presented in two, separate catalogs: «Swiss Army Knives» and «Household and Professional Knives». We are pleased to offer this streamlined assortment, with our best, and perhaps future classics.

STAINLESS STEEL

All pocket knife components (excluding rivets) are made from martensitic stainless steel. Making a blade that offers optimum functionality and durability requires the

right steel alloy. The steel must ensure excellent edge retention and sufficient resistance to rust, but should also be flexible so that it does not break during use.

The following steel alloys are used for Swiss Army Knives:

MATERIAL NO.	FOR	ABBREVIATION AISI	C (%)	CR (%)	MO (%)	V (%)
1.4110	blade	X 55 Cr Mo 14	0.48 - 0.60	13.0 - 15.0	0.50 - 0.80	≤ 0.15
1.4021	spring	X 20 Cr 13	0.16 - 0.25	12.0 - 14.0		
1.4031	tools	X 39 Cr 13	0.36 - 0.42	12.5 - 14.5		0.1 - 0.2

All Victorinox alloys are in accordance with Regulation (EG) no. 1935/2004 for products that come into contact with food.

SUSTAINABILITY

Since decades, issues concerning environmental protection and sustainability have been given high priority at Victorinox.

100% RECYCLED STEEL

SCALE MATERIALS

Cellidor 	Cellidor is an organic, thermoplastic cellulose ester that incorporates a high proportion of renewable natural cellulose material. Unlike traditional plastics, it is only partially dependent on fossil fuels. Components made of Cellidor exhibit an exceptional high-gloss finish with perfect depth effect. To improve abrasion and scratch-resistance, scales printed with a special promotional motif are treated with a protective coating. Max. usable temperature 65 °C.	Companion, Swiss Card, Evolution, Offiziersmesser
Acrylonitrile butadiene styren 	Acrylonitrile butadiene styrene is an amorphous thermoplastic. ABS plastics exhibit excellent toughness, notched impact strength, impact strength, flexural rigidity and surface hardness. Max. usable temperature 80 °C.	Companion, Swiss Card, Evolution, Offiziersmesser
Polyamide 	Nylon is a term commonly used primarily in the U.S. to describe polyamides (PA). Polyamides are suitable for pocket knife scales because they exhibit better mechanical abrasion resistance. This also has benefits from a production perspective. Compared to high-gloss and smooth Cellidor components, they have a more structured surface. Max. usable temperature 90 °C.	Workman, Ranger
Aluminium 	Alox scales are punched from aluminum, embossed and then anodised in a subsequent process stage. The Eloxal process uses anodic oxidation to create a protective layer. This layer of oxide is hard and protects the scales from damage and corrosion, up to a certain degree.	Pioneer
Walnut 	Wood is a natural, renewable resource. The walnut used by Victorinox comes from Swiss forests and is in full compliance with EU Regulation No. 995/2010 (the EU Timber Regulation). The wood of the walnut tree is very solid, tough and strong.	Nail Clip Wood, Evolution Wood, Ranger Wood

Ask anyone who's ever gotten out of a sticky situation thanks to a multi-tool of this kind, or anyone who has come to appreciate their precision, versatility and stability in everyday life – they wouldn't be without them. These are the most robust tools currently available in the Victorinox range – the exceptionally powerful Swiss Tool, and its younger and slightly handier brother, Swiss Tool Spirit.

When it comes to growing, grafting and looking after fruit trees and ornamental plants, there are no high-tech shortcuts that can match a sharp, top-quality tool. After all, success largely depends on making precise and expertly executed cuts – that’s the only way to minimize damage to the plants. It’s no surprise then that Victorinox knives have been the top choice for professionals in garden centers and tree nurseries all over the world for decades.

MULTI-TOOLS

For dirty and sticky blades, we recommend opening and closing the blades several times in warm water until they move freely. Allow to dry completely. Add a drop of oil between the blades and the tool casing or springs as well as other friction surfaces.

Muti-tools should never be cleaned in a dishwasher.

We recommend:
Multi-Tool Oil (item number 4.3301)

Key features:

- Maintains tool mechanics
- Protects against corrosion
- Meets NSF H1 requirements

HOUSEHOLD AND PROFESSIONAL KNIVES

Victorinox recommends rinsing knives under running water directly after use. Salt or acidic leftovers can lead to spotting if the knife is left uncleaned over longer periods of time. Knives that are dishwasher safe are marked with the corresponding icon within the catalog.
